COURSEWORK

Data Structures and Algorithms
Object Oriented Programming
Object Oriented Systems
Database Management Systems
Graph Theory and Combinatorics
Computer Networks
Computer Graphics
Software Engineering
Mathematics and Statictics

SKILLS

Programming Languages
C C++ Java Python

TECHNOLOGIES
HTMl5 CSS JAVASCRIPT NODE

LIBRARIES & FRAMEWORKS
ReactJS Numpy Seaborn Pandas
Numpy Matplotlib

DATABASES
MongoDB My SQL

Operating Syestem
Windows Linux

SOUMABHA GHOSH
Aspiring SDE

I am a second year engineering student majoring in Information Technology at Jadavpur University. I am interested in coding challenges and a goodknowledge in DataStructure and Algorithms. Apart from this I have interest in Frontend Development using HTML,CSS,JAVASCRIPT.

Experience

2022

Social Media Application

It is a social media web application using **React JS** in front end and using **Express, MongoDb** and **Node** in back end . In this application you can follow another user can see his/her post . Here is another real time chat application which is using **Socket.IO** .No message is stored in anywhere you can see another persons message by real time

2022

Personal Portfolio

It is my personal portfolio website using **HTML5 ,CSS** and CSS transitions,It has five sections in it it holds my various information like projects link social media etc. I attached a google maps api which fetches location by latitude and longtitude

2022

Movies Recommendation

It is a programme which recommends movie using its ratings views.It is made bye standard data science libraries including **matplotlib ,pandas, seaborn, numpy.** I used ml200k data sets from internet to fetch the movie names.
